npm -v

If that works, then the issue is definitely PATH-related.

If it still doesn't work, try running npm directly:

& "C:\Program Files\nodejs\npm.cmd" -v

and

& "C:\Program Files\nodejs\node.exe" -v

Paste the outputs of:

node -v

npm -v

& "C:\Program Files\nodejs\npm.cmd" -v

and I'll pinpoint whether it's a PATH issue, PowerShell execution policy issue, or a broken Node installation.
